

# Food Systems Solutions

## **AGFS 750/ANFS 850 - Spring 2025**

Explore solutions to today's most pressing food system challenges—unsustainable farming, inequitable access to healthy food, diet-driven disease, and insecure livelihoods for farmers and food chain workers.

Learn to critically analyze policies, programs, and social movements driving change. Identify strengths, weaknesses, blind spots, and leverage points to create a more just and sustainable food future. Learn with a small group of students from across UNH.

**Dept. of Agriculture, Nutrition, and Food Systems**

**Wed & Friday: 11:10-1, 4 credit hours**

**Instructor: Analena Bruce**
